

FINDING NORTH

NORTH WITH A COMPASS

All compasses include a magnetized needle that orients itself to the magnetic North of the Earth.

NORTH WITHOUT A COMPASS (DAY)

Point the 12 o'clock mark towards the sun if you're in the Southern Hemisphere. Then find the halfway mark between the hour hand and the 12 o'clock point to locate the north-south line. In the Southern Hemisphere, true north is the side pointing towards the sun.

NORTH WITHOUT A COMPASS (NIGHT)
